PROFESSIONAL EXPERIENCE

European Central Bank - DG Statistics, Banking Supervision
Data Science Trainee

Frankfurt, Germany
Sep 2025– Present

- Maintaining a supervisory reporting database to provide accurate and up-to-date supervisory metadata to European supervisory institutions
- Validating European Banks' KM1 disclosures against internal data through automated checks and analyzing discrepancies to ensure Pillar 3 (Basel III) reporting compliance
- Developing a full-stack web application to centralize and maintain supervisory reporting metadata, for National Central Banks/Authorities, and Joint Supervisory Teams from the Single Supervisory Mechanism
 - Designed data model architecture, programmed data management workflows, and interactive frontend
- Developing a Python AI inbox agent prototype using a RAG pipeline to automate email drafting, summarize discussions, and track decisions

International Energy Agency - Energy Modeling unit
Energy Modeling Analyst (intern)

Paris, France
Feb 2025– Aug 2025

- Revamped and migrated an investment calculation module from Vensim (simulation software) to Python
- Authored sections of the IEA published report "[*The Future of Electricity in the Middle East and North Africa*](#)" (*Chapter 2 - Section on Electricity Demand Outlook*)
- Designed, programmed and implemented a web scraping tool application to automate and facilitate large-scale data search and collection
- Conducted policy research on building energy efficiency and envelope standards in EMEA regions

Deloitte - M&A Transaction Services, Financial Advisory, Analytics Team
Intern

Frankfurt, Germany
Nov 2024– Jan 2025

- Analyzed and processed granular corporate sales data to produce actionable insights for due diligence reports
- Created interactive Tableau dashboards allowing multi-perspective analysis of client sales data
- Refined, cleaned, and structured large financial datasets using Alteryx
- Developed back-end Python and SQL workflows for a simulation tool that would automatically generate multi-year sales projections and integrate the results into an interactive Tableau dashboard
